Environment:	**Expected result:** After clicking on the issue book category user should successfully added number of books, user want to renew **Actual Result :** In the issue book category allowing upto the limit of two number of books and after that showing error due to the application crashed		

Description

The user of Library Management Software is not able to renew the book which he/she has issued already. Moreover, after adding more than two books in the Issue Book category the application is getting crashed again and again.

"Steps to reproduce"

1. Go to the Library Management Software Application
2. User will able to add the books on renew option he received from the library
3. Select the books you want to issue
4. After selecting the books go to the add to issue category
5. Click on the "add to issue" button
6. Observe the result
